To Whom It May Concern:

As the owner of a sales and service air conditioning company, my time is very limited. I initially thought meeting with Lewis & Associates would be unproductive, but I was pleasantly surprised.

John Lewis and his team recommend savings in several key expense areas specific to our type of business, all of which will impact our bottom line for years to come. Since their initial analysis was accomplished away from our office, there was no disruption to our business whatsoever. Ultimately, they have been able to save Batchelor's thousands of dollars per year with little effort on our part.

I recommend that you invest a few minutes with Lewis & Associates. It could add a great deal to your bottom line without costing your business anything. Please call me at 251) 476-4321 if you have questions about our experience.

Sincerely,

Edward S. Leatherbury  
President
